

The purpose of this amendment is to cancel solicitation DTFR53-04-R-00002 in its entirety. The government requirement for FRA's Human Factors Research and Development procurement has changed significantly. Once the Federal Railroad Administration (FRA) has clearly redefined its requirement based on current findings for program support in this area, a solicitation will be reissued. The solicitation will be issued on an unrestricted basis and all responsible sources may submit a proposal. All companies that submitted a proposal under the subject solicitation are invited to submit a proposal under the new solicitation. Please contact Sharon Flowers, 202-493-6419 to request the return of your proposal no later than July 31, 2003. FRA will destroy all proposals not returned at the request of the respective offerors.
